Professional Summary

Multidisciplinary product designer with 5+ years of experience crafting accessible, scalable, and human-centered digital solutions. Adept at leading cross-functional design efforts in complex environments, from enterprise banking to fast-paced startups. Skilled in developing robust design systems, optimizing user workflows, and translating business objectives into elegant product experiences. Strong collaborator with a passion for thoughtful problem-solving, continuous learning, and mentorship.

Experience

Senior Product Designer

Neo Financial — Toronto, ON

Nov 2025 – Present

- Led the migration of Tims Financial customers through rail tenancy swaps, successfully migrating more than 60,000 Tims Financial clients to Neo with a 97% funnel conversion rate.
- Pioneered Neo Financial's support vision framework, integrating support throughout the app to grow CSAT, ARR, and channel mix rates significantly while saving \$10,000 per month in operating costs.
- Collaborated with Product Managers, Designers, and Content to create high-fidelity mockups and experience concepts used to align teams on problem spaces and potential solutions.
- Contributed to early-stage experience strategy work, helping map customer journeys and identify usability and operational gaps across key banking touchpoints.
- Partnered with Risk, Fraud, and Operations teams to design fraud mitigation and AML-focused experiences that balanced customer trust with security, improving detection and escalation flows while reducing friction for legitimate users across sensitive banking journeys.
- Created systems and templates for key screens impacted by multiple concurrent projects, standardizing and reimagining the information architecture to solve current problems while enabling future scalability.
- Leveraged AI-assisted tools, including Claude Code, to accelerate prototyping, documentation, and cross-functional handoff within a fast-moving banking environment.

Product Designer

Kinro

Feb 2026 – Jul 2026

- Built and documented Kinro's first design system, establishing reusable components and UI standards that improved consistency and sped up design-to-development handoff.
- Owned the public-facing landing page in Framer, driving iterative improvements to messaging, layout, and conversion.
- Redesigned onboarding and checkout flows, improving member signup conversion and reducing drop-off across the funnel.
- Ran A/B tests on the checkout experience to identify and ship the higher-converting flow with fewer user errors.
- Designed supporting product and compliance flows for new offerings launched during tenure, including Generic Semaglutide, sexual health medication, and insurance/prior authorization verification.
- Partnered directly with the COO to prioritize and execute design work across shifting, fast-moving startup priorities.

UX Designer

OpenText — Toronto, ON

Jun 2025

- Supported OpenText design team during a one-month contract, assisting in clearing a significant backlog to help full-time designers meet delivery timelines.
- Designed a high-fidelity landing page and conversation flows for a B2B customer support AI chat experience, aligning with brand and user needs.
- Created and documented new reusable components while defining semantics for their updated design system, Blueprint version 2.

- Contributed to the migration of design patterns from Bootstrap to Tailwind by establishing consistent standards and scalable, maintainable UI components.
- Collaborated cross-functionally with developers and product managers to prioritize backlog tasks and ship production-ready designs efficiently.

Product Designer

CIBC — Toronto, ON

Dec 2021 – Mar 2025

- Designed and launched key client-facing experiences, including the Virtual Assistant, resulting in significant improvements to user satisfaction with self-service options and reduced support requests.
- Led the transition from CIBC's legacy design system to the newly built True North and User Interaction Document systems, resulting in improved cross-team consistency and modernizing the bank's digital experience to align with evolving UX and UI standards.
- Spearheaded research and implementation of design tokens and component libraries, accelerating handoff time and boosting developer-designer alignment.
- Created centralized UX resources and templates by interviewing cross-functional stakeholders to identify and solve internal workflow pain points.
- Designed for mobile-first experiences in collaboration with native app teams to ensure consistency across iOS and Android platforms.
- Championed accessibility design initiatives, embedding WCAG 2.2 standards into product workflows and collaborating with QA and analytics to validate and continuously iterate on improvements.
- Introduced scalable micro-interaction patterns and prototyping workflows to simulate real user behaviour, improving feedback quality and increased usability testing accuracy.
- Provided mentorship to junior and mid-level designers, created onboarding resources, and led design reviews to foster a collaborative and growth-oriented team culture.
- Partnered with product managers and leadership on business case proposals and roadmapping sessions to ensure design was aligned with strategic business objectives.

UI/UX Designer (Contract)

Sloika — Toronto, ON

Aug 2021 – Dec 2021

- Led the end-to-end design of an MVP for a curated NFT photography marketplace, helping secure \$2M in seed funding.
- Created core user flows and interactive components with minimal supervision, balancing speed with visual integrity.
- Established an internal design system and design-to-developer documentation pipeline that enabled faster iteration and team scaling.
- Collaborated with the founding engineer to validate product decisions, streamline MVP scope, and ensure readiness for investor demos.

Education

Bachelor of Design, Graphic Design & Photography

OCAD University, Toronto, ON • 2016 – 2021

Visual Communication Design

Alberta University of the Arts, Calgary, AB • 2015 – 2016

Skills

Design: UX Design, UI Design, Visual Design, AI-Assisted Design, Design Systems, UX Research, Micro-interactions, Interaction Design, Accessibility (WCAG 2.2)

AI & Emerging Tools: Claude Code, ChatGPT, AI-Assisted Prototyping, Prompt Engineering

Tools: Figma, Sketch, Adobe XD, Illustrator, Photoshop, Lightroom, Miro, Webflow, Framer, Confluence, JIRA

Other: Product Strategy, Product Thinking, Design Thinking, Business Needs Analysis, Time Management, Project Management
